Magic cube. In mathematics, a magic cube is the 3-dimensional equivalent of a magic square, that is, a number of integers arranged in a  $n \times n \times n$  pattern such that the sums of the numbers on each row, on each column, on each pillar and on each of the four main space diagonals are equal to the same number,...

### **Magic cube - Wikipedia**

A magic hexagram of order 2 is an arrangement of numbers in a hexagram with triangular cell with 2 cells on each edge, in such a way that the numbers in each row, in all three directions, sum to the same magic constant M.

Saturn has also been associated with Satan and this, for numerous reasons. First, many authors argue that the word Satan is derived from the word Saturn. Second, Saturn is associated with the color black as well as Satan. Third, Ancients considered Saturn to be the farthest planet from the sun , the latter being associated with the principle of Good.

The line within the circle indicates where each inner tri-gram has move from and to. An example of a new hexagram, which is indicated by the arrow, is created by the tri-gram moving to its new position . The hexagrams are then located halfway along the line which becomes there position within the Great I Ching Circle.

I love this item from Thomas! More magical and more convincing than any item like it (even than the beautiful Mystery of the Pyramids Outdone by Wellington).It is just 6" high and you can show inside the the tube before and after each move, you can separate the cubes during the routine, and you also have the cubes changing color at the end too!
