If you want to organize and manage your data with Access but just don't want to spend time creating a database from scratch, try using a desktop database template.

### **Use a template to create an Access desktop database**

There have been several other great improvements to the table level of Access. One of them is the introduction of two new field data types. One of these two data types is a multi-value field. Eliminating long workarounds of the implementation of many-to-many relationships this data type easily allows the creation and usage of a multi value list, which is somewhat expected from its given name.
