

Adolescence Robert Feldman

Adolescence Robert Feldman

Adolescence (from Latin *adolescere*, meaning 'to grow up') is a transitional stage of physical and psychological development that generally occurs during the period from puberty to legal adulthood (age of majority). Adolescence is usually associated with the teenage years, but its physical, psychological or cultural expressions may begin earlier and end later.

Adolescence - Wikipedia

The neurobiological processes that define adolescence and influence risk-taking are complex, and the role they play is emerging as a key factor in adolescent behavior. These processes must be understood in the context of psychological development and social influences. B. Bradford Brown provided an overview of psychosocial development and adolescent risk-taking, and Valerie Reyna explored ...

The Psychology of Adolescence - The Science of Adolescent ...

Le début de l'adolescence est plus clairement définie que sa fin. Le début de l'adolescence est marqué par le début de la puberté, processus biologique enclenché par des hormones provoquant l'adrénarchie (entre 6 et 9 ans), la poussée de croissance et la gonadarchie. Ce calendrier varie cependant beaucoup d'une personne à une autre, selon les régions du monde et selon les sexes [4].

ABSTRACT - The authors propose that individuals differ with respect to their degree of susceptibility to advertising (STA). Two studies assess the validity of an original, parsimonious measure of STA and examine the role of this trait as a moderator of persuasion processes. Study 1 shows the STA ...
