In 1994 the British Journal of Cancer confirmed these findings and published histologic proof that the cancer cells were blanketed by these inhibitors. Stromal cells that support the growth of certain cancers such as breast cancer were also seen to overproduce these inhibitors thus augmenting the necessary immune blockade essential for the tumor cells to survive.

Silver is used widely in wound dressings and medical devices as a broad-spectrum antibiotic. Metallic silver and most inorganic silver compounds ionise in moisture, body fluids, and secretions to release biologically active Ag⁺. The ion is absorbed into the systemic circulation from the diet and drinking water, by inhalation and through intraparenteral administration.

The history of medicine shows how societies have changed in their approach to illness and disease from ancient times to the present. Early medical traditions include those of Babylon, China, Egypt and India. The Indians introduced the concepts of medical diagnosis, prognosis, and advanced medical ethics. The Hippocratic Oath was written in ancient Greece in the 5th century BCE, and is a direct ...

The composition of the biosphere is a fundamental question in biology, yet a global quantitative account of the biomass of each taxon is still lacking. We assemble a census of the biomass of all kingdoms of life. This analysis provides a holistic view of the composition of the biosphere and allows us to observe broad patterns over taxonomic categories, geographic locations, and trophic modes.
