Risks. Because MRI uses powerful magnets, the presence of metal in your body may be a safety hazard or affect a portion of the MRI image. Before having an MRI, tell the technologist if you have any metal or electronic devices in your body, such as:

MRI technicians use cutting-edge technology to create high-definition, three-dimensional pictures of organs and tissues inside the body. These images are among the most powerful diagnostic tools available and are particularly useful for studying the brain, heart and muscles as well as certain kinds of cancers.

Gadolinium MRI Side Effects. The product liability lawyers at Saiontz & Kirk, P.A. are investigating potential cases for individuals who may be suffering from side effects of gadolinium used in MRI contrast agents, such as Omniscan, Optimark, Magnevist and others. The buildup of the MRI dye may result in the development of a painful and debilitating condition, known as Gadolinium Deposition ...

Magnetic resonance imaging (MRI) is a medical imaging technique used in radiology to form pictures of the anatomy and the physiological processes of the body in both health and disease. MRI scanners use strong magnetic fields, magnetic field gradients, and radio waves to generate images of the organs in the body. MRI does not involve X-rays or the use of ionizing radiation, which distinguishes ...

MRI Contrast Gadolinium Toxicity. Gadolinium is a rare earth metal, which is used in MRI contrast dye to help enhance the images. While the manufacturers have maintained that it is safe for individuals without kidney problems, mounting evidence confirms that gadolinium may be retained in the body and brain, resulting in painful and debilitating side effects for some patients.

MRI (an abbreviation of magnetic resonance imaging) is an imaging modality that uses non-ionising radiation to create useful diagnostic images. MRI was initially called nuclear magnetic resonance (NMR) imaging after its early use for chemical analysis. The initial "nuclear" part was dropped about 25 years ago because of fears that people would think there was something radioactive involved ...
