Movements During Cuspid*

### **Cephalometric Evaluation Of Second Premolar**

INTRODUCTION. Since the early days of orthodontics the need for tooth extractions in certain orthodontic situations has been discussed. In the early twentieth century, Angle favored non-extraction orthodontic treatment based on the concept of the occlusion line. 23 He believed it possible to correctly position all of the 32 teeth in the dental arches and, as a result, the adjacent tissues ...

ABSTRACT. OBJECTIVE: to enhance the knowledge of the distalizing treatments, a study was conducted with a distalizing novel technique: the tripod. METHODS: the study included 6 patients with Angle class II due to mesogression of the superior molars and with clinical absence of the second superior molar. The modifications produced by the tripod at the dental level were evaluated.

Functional appliances. When there is a maxillary overjet, or Class II occlusion, functional appliances can be used to correct the occlusion, it is recommended that the professional be a specialist in orofacial orthopaedics to perform this type of appliance. The most common fixed appliance being used today is the Pre-adjusted Edgewise Appliance.
