Obesity. Obesity is the most common nutritional disease in dogs and can lead to a range of illnesses and diseases. Cavalier King Charles spaniels are pre-disposed to obesity, according to evidence garnered in a 1986 veterinary research study of dogs in the United Kingdom and confirmed more recently in a 2007 report, a 2010 report, and a 2013 presentation, among several others.

1. Introduction. Over recent years, the market demand for gluten-free products has increased significantly. One of the reasons for this increasing trend is the rise in diagnosed cases of celiac disease (Gallagher, Gormley, & Arendt, 2004). Although the prevalence of celiac disease is approximately 1% of the general population in Europe and the United States, the sole treatment is a unique ...
