Environmental Chemistry Of Explosives And

A series of articles documenting the eco renovation a house built in 1970 and reviewing products used in the renovation. We expect the renovations to be spread out over a few years.

EnvironmentalChemistry.com: Environmental, Chemistry ...

The largest commercial application of explosives is mining. Whether the mine is on the surface or is buried underground, the detonation or deflagration of either a high or low explosive in a confined space can be used to liberate a fairly specific sub-volume of a brittle material in a much larger volume of the same or similar material.

RTI Laboratories is a full-service environmental, chemical and materials testing laboratory. Established in 1986 and operating out of 24,000 square feet in Livonia, Michigan, RTI has grown into one of the largest independent testing labs in the Midwest by serving clients such as the U.S. Government, major automotive companies and many tier one suppliers.

RDX is an organic compound with the formula (O₂ NNCH₂)₃. It is a white solid without smell or taste, widely used as an explosive. Chemically, it is classified as a nitramide, chemically similar to HMX. A more energetic explosive than TNT, it was used widely in World War II and remains common in military applications.. It is often used in mixtures with other explosives and plasticizers or ...
