1. Fly, flit, flutter, hover, soar refer to moving through the air as on wings. Fly is the general term: Birds fly. Airplanes fly. To flit is to make short rapid flights from place to place: A bird flits from tree to tree. To flutter is to agitate the wings tremulously, either without flying or in flying only short distances: A young bird flutters out of a nest and in again.

UPDATE: April 21, 2015. ON APRIL 10th, The New York Times published an op-ed of mine about cockpit automation and the future role of the airline pilot. This was my sixth op-ed to run in the Times, but easily my favorite, given my long-simmering frustration over the topic in question.. As my regular readers are aware, one of my biggest pet peeves is the public's widely held belief that ...

The space opera interstellar epic Star Wars uses science and technology in its settings and storylines. The series has showcased many technological concepts, both in the movies and in the expanded universe of novels, comics and other forms of media. The Star Wars movies' primary objective is to build upon drama, philosophy, political science and less on scientific knowledge.
