### **Honey Bee Biology & Beekeeping - Mann Lake Ltd.**

Honey bees are social insects, living in colonies where specific tasks are completed by different types of honey bees in the hive. In this article, we'll go over the basic honey bee biology and the differences between queens, drones and worker bees.

### **Honey Bee Biology: Queens, Drones and Workers | Dadant & Sons**

Today, honey bees are kept in artificial hives throughout the United States, and a large and sophisticated beekeeping industry provides valuable honey, beeswax and pollination services. A large section of the industry, well represented in Georgia, is devoted to producing queens and bees for sale to other beekeepers.

### **Honey Bee Program - Bees, Beekeeping & Pollination - Honey Bee Biology - bees.caes.uga.edu**

Honey Bee Biology. Honey bees, like ants, termites and some wasps, are social insects. Unlike ants and wasps, bees are vegetarians; their protein comes from pollen and their carbohydrate comes from honey, which they make from nectar.

Honey Bee Biology Seasonal cycles of activities in honey bee colony A colony of honey bees comprises a cluster of several to 60,000 workers (sexually immature females), a queen (a sexually

developed female), and, depending on the colony population and season of year, a few to several hundred drones (sexually developed males).

**Honey Bee Biology | MAAREC - Mid Atlantic Apiculture Research & Extension Consortium - University of Delaware**

Honey Bee Biology . Honey bees are one of the few insects that have a social structure, a caste, which consists of a single reproductive queen (only egg layer in the colony), numerous drones (males) depending on time of year, and a small number to about 60,000 worker bees or non-reproductive female bees.

**Bee Biology and Behavior - San Diego Bees - ucanr.edu**

Basic bee biology for beekeepers . Although humans have had a long association with honey bees, *Apis mellifera*, we have not domesticated the honey bee. A beekeeping "key" is skillful application of knowledge of bee/colony biology. In a phrase - Beekeeping is Applied Bee Biology.
