Note. IronPython only knows about assemblies that have been loaded using one of clr.AddReference-methods.It is possible for other assemblies to already be loaded before IronPython is loaded, or for other assemblies to be loaded by other parts of the application by calling System.Reflection.Assembly.Load, but IronPython will not be aware of these.

**IronPython .NET Integration**
After filling a range of the input buffer at the specified index submit it to the component. Many decoders require the actual compressed data stream to be preceded by "codec specific data", i.e. setup data used to initialize the codec such as PPS/SPS in the case of AVC video or code tables in the case of vorbis audio.
