Horizontal Lines. The equation of a horizontal line is $y = b$ where b is the y -intercept.. Since the slope of a horizontal line is 0, the general formula for the standard form equation , $y = mx + b$ becomes $y = 0x + b$ $y = b$.Also,since the line is horizontal, every point on that line has the exact same y value.

Graph - how much I make at the mall: . In other words, when we graph the line, we can go over (back and forth) to see what the hours are and then look up to see how much we would make with that many hours. You can think of the x as the "question" on the bottom where you go back and forth, and then look up and down to get the "answer" where the y is - the answers are all on ...
