Analogy plays a significant role in problem solving, as well as decision making, argumentation, perception, generalization, memory, creativity, invention, prediction, emotion, explanation, conceptualization and communication. It lies behind basic tasks such as the identification of places, objects and people, for example, in face perception and facial recognition systems.

Analogy as a Part of Language . Making comparisons between two different things requires a flexible use of language. Though on the surface a metaphor or complex analogy may not make much sense, digging a little deeper to understand the relationships between the things being compared will usually clear things up.

In logic and philosophy, an argument is a series of statements (in a natural language), called the premises or premisses (both spellings are acceptable), intended to determine the degree of truth of another statement, the conclusion. The logical form of an argument in a natural language can be represented in a symbolic formal language, and independently of natural language formally defined ...

Begging the Question. A form of circular reasoning in which a conclusion is derived from premises that presuppose the conclusion. Normally, the point of good reasoning is to start out at one place and end up somewhere new, namely having reached the goal of increasing the degree of reasonable belief in the conclusion.

Formal logic is an a priori, and not an empirical, study. In this respect it contrasts with the natural sciences and with all other disciplines that depend on observation for their data. Its nearest analogy is to pure mathematics; indeed, many logicians and pure mathematicians would regard their respective subjects as indistinguishable, or as merely two stages of the same unified discipline.

ambiguity. The presence of two or more distinct meanings for a single word or expression. In itself, ambiguity is a common, harmless, and often amusing feature of ordinary language. When unnoticed in the context of otherwise careful reasoning, however, it can lead to one of several informal fallacies.. Example:"I'll give you a ring tomorrow." could signify either the promise of a gift of ...
